

	Thickness range
PE films for laminate used in food and hygienic packaging	20 – 200 µm
PE+AS as packaging for granular or conductive materials	20 – 200 µm
PE+Peel for dairy products packaging, with certain friction force, opening force is regulated every 0.5N	30 – 90 µm
PE+Anti-fog films for fresh, raw fruits and vegetables	40 – 60 µm
Deep-drawn embossed films in tire industry as separating layer	40 – 180 µm
Foils for open - close packaging	50 – 60 µm
PE heat shrinkable films	30 -160 µm
PE film for hot laminate with PET	40 – 60 µm
Protective films	25 – 100 µm
